**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth Haas on June 14, 2007.

The application has been amended as follows:

Claim 1 line 2, the phrase "having as an input," has been changed to ---for receiving---

Claim 1 line 3, the word "conditions" has been changed to ---quality information---

Claim 1 line 4, the word ---for--- has been inserted after "adaptor".

Claim 1 line 5, the word ---the--- has been inserted before "channel"

Claim 13 line 7, after "receiving preemption values (P)," the phrase ---wherein P is based on the QoS and channel quality information--- has been inserted.

Claims 4-12 have been cancelled.

***Allowable Subject Matter***

2. Claims 1-3, 13, and 14 are allowed.

The following is an examiner's statement for reasons for allowance:

Art Unit: 2616

3. Claims 1 and 13 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose the bandwidth allocation adaptor receiving queue weights, channel quality information, and the preemption values, and outputting modified queue weights based on the queue weights, the channel quality information, and the preemption values. It is noted that the closest prior art, Jiang et al. (US 7,046,678) shows a packet scheduling method capable of allocating radio resource dynamically based on channel conditions. However, Jiang et al. fails to disclose or render obvious the above underlined limitations as claimed.
